Project Management - 15 years**

Broken Arrow Electric Supply's staff of Industrial Solution Specialists has significant experience in LV/MV switchgear, LV MCC, MV motor starters, variable speed drives. We can assist with arc flash reduction or arc resistant applications, along with power metering and monitoring, and can help optimize your E-House design. **BAES** project management will oversee your project, maintain schedule, track material, and coordinate equipment interfaces.

We offer a full package of services to help your project proceed smoothly and efficiently. This can include pre-project site inspections to suggest options to enhance the project, installation services and start-up services to get the project on line as quickly as possible. We also have experience to help with surge protection, power factor correction, PLC automation & controls, hazardous location products, wire and cable solutions, heat trace products, and lighting systems.

Whether you are building a gas plant or expanding a terminal, **Broken Arrow Electric Supply** has the knowledge and experience to help you succeed.

Broken Arrow Electric Supply is a full service electrical distributor of products, equipment, services, and solutions for the electrical industry.
